32ª	You are given an integer array of size N, representing jars of chocolates. Three students A, B, and C respectively, will pick	30024
,8R23cDC	chocolates one by one from each chocolate jar, till the jar is empty, and then repeat the same with the rest of the jars. Your task is to fine and return an integer value representing the total number of chocolates that student A will have, after all the chocolates have been picked from all the jars.	
BRIL	Note: Once a jar is done A will start taking the chocolates from the new jar.	52A3BR
